

Bring added mobility, security and management to your fax communications with AcePacket

For many businesses, faxing is an integral part of daily business communications. However, with today's mobile workforce it becomes increasingly difficult to manage fax communications when it comes to access, privacy and management. These problems can be quickly and cost effectively addressed with an Internet based fax solution.

Solution

With Internet Fax service from AcePacket you can use your fax control panel to browse documents on your computer, then select the one you would like to fax out. You can also opt to download our fax software that will install a virtual printer on your PC and allow you to print any file type to any fax machine. We support most popular office and image file formats including Word, Excel, PowerPoint, Adobe PDF and more. Also you can receive your faxes into your email or to your fax control panel.

Benefits

- Have your AcePacket faxes forwarded directly to your existing fax machine. Add the ability to receive multiple faxes simultaneously, without the costs of installing additional phone lines. Gain a professional and established image that a toll-free fax number provides without having to change a thing to your current faxing infrastructure.
- With AcePacket Fax you won't need an extra phone line for faxing or even a fax machine. All you need is a computer and internet access and you'll be able to send and receive faxes. It's just like having your fax machine with you, everywhere you go.
- All AcePacket fax numbers have been provisioned to allow multiple incoming faxes, simultaneously. This means if there are two or more people trying to fax you at the same time, neither one will get a busy signal and you'll receive both faxes.

Increased security and privacy

- Incoming and outgoing faxes are delivered to your email inbox, ensuring privacy
- Faxes can be archived electronically so documents don't get lost or misplaced

Reduced costs

- No long distance charges within Canada
- No costly fax machines
- No wasted paper, toner costs or maintenance fees
- Flexible pricing based on fax volumes

Increased convenience and mobility

- Faxes arrive directly in your email inbox, eliminating the need to go to a physical fax machine to manage your faxes
- Send and receive faxes from anywhere you can access the Internet – at the office, airport or hotel
- Access your faxes from your PC, laptop, or mobile device
- Improve productivity by sending and receiving faxes to many people at once

Secure Online Control Panel

- View, print, save, and archive all received faxes
- Send faxes to any fax machine directly from your computer
- Share received emailed faxes with others
- Archive and label sent and received faxes for quick retrieval
- Manage your fax notification preferences
- Get detailed reports on sent and received faxes

View caller id of each fax sender to your fax number

Features

- Unique personal local fax number
- Flexible pricing options based on fax volumes
- Ability to send up to 20 faxes at once
- Archiving of faxes for 1 year
- Auto -resend and delivery confirmation
- File formats supported include Word, Excel, Text, HTML, and PDFs
